The email you have provided to our office **must** match the email you use to create your portal account.

Download the athenaPatient mobile app for easy access on your phone.

Once you have created your athena portal account you may access your portal through the athenaPatient mobile app. Download from the app store by using the QR codes below.

Download for iOS

Download for Android

Note: You can also provide caregivers or guarantors access to your patient portal account! You can invite them from your patient portal. Just log in, click your name in the top right corner, and from there, "My Profile." A series of tabs will populate at that top; click "Family Access" to begin. If needed, you can also call us, and we can send your designated point of contact an invitation.
